	Examiner Wayne Langel	Art Unit 1754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1754

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Igarashi or Okada et al or Fujisou et al or Shioiri et al. No distinction is seen between the processes disclosed by Igarashi, Okada et al, Fujisou et al, and Shioiri et al, and that recited in applicants' claims. Igarashi, Okada et al, Fujisou et al, and Shioiri et al all discloses methods for desulfurizing liquid hydrocarbons such as kerosene or naphtha with a metallic desulfurizing agent, followed by desulfurizing the liquid hydrocarbon. (See the Abstract of each reference.) The desulfurization conditions disclosed in the references could be considered to be embraced by the formula as recited in applicants' claim 1. In any event, it would be obvious to determine suitable or optimum desulfurizing conditions in the processes of Igarashi, Okada et al, Fujisou et al, and Shioiri et al such that the formula recited in claim 1 would be satisfied, since it would be within the skill of one of ordinary skill in the art to determine suitable or optimum temperature and pressure conditions in the process.

Art Unit: 1754

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is indefinite as to what would constitute "test method for distillation at atmospheric pressure stipulated in JIS K2254 Petroleum products-Determination of distillation characteristics" since this standard is subject to change.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Langel whose telephone number is 571-272-1353. The examiner can normally be reached on Monday through Friday, 8 am - 3:30 pm Eastern Time.
